ADEWALE ADEOGUN

SOFTWARE ENGINEER | PYTHON, JAVASCRIPT & .NET | BACKEND, APIs & AI AUTOMATION

adewaleeadeogun@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

- Software Engineer with production experience in healthcare and energy, delivering backend services, data tools, web interfaces and unattended automation. Promoted from RPA Developer to Senior RPA Developer.
- Core stack includes Python, JavaScript, C#, VB.NET, SQL, Node.js, Express.js, Flask, FastAPI, ASP.NET, SQLite3 and MongoDB, alongside UiPath and enterprise automation platforms.
- Lead two developers and translate complex workflows into reliable software with measurable outcomes, testing, security, documentation and production support.

TECHNICAL EXPERTISE

Core Languages: Python, JavaScript, C#, VB.NET, SQL
Backend & APIs: Node.js, Express.js, FastAPI, Flask, ASP.NET, Entity Framework, REST/HTTP APIs, JSON, SQLite3, MongoDB
Web Engineering: HTML5, CSS3, responsive UI, JavaScript DOM, Figma-to-code, reusable front-end components
AI & Data: UiPath Agentic AI, AI-assisted development, machine-learning concepts, Power BI, SPSS, data processing and reporting
Automation: UiPath, Blue Prism, Power Automate, Power Apps, Orchestrator, REFramework, Selenium/browser automation
Cloud & Tooling: AWS, Azure, Git/GitHub, Jira, Monday.com, Office 365, SharePoint, Excel
Additional: Java, C++, UE5, microcontrollers, hardware/software integration

PROFESSIONAL EXPERIENCE

Deskstones Limited | Leeds, UK — **Oct 2023 - Present**

Senior RPA Developer — May 2025 - Present

- Lead two developers delivering production automations and backend services using UiPath, VB.NET, Python, JavaScript, HTML/CSS, CMD, REST APIs, Selenium and Orchestrator.
- Built payroll-processing automation integrating AWS storage through APIs and UI automation, reducing processing time by 60%; standardised selectors and reusable components.
- Built backend projects with Node.js, Express.js, MongoDB, SQL, Flask, FastAPI, Azure and AWS, while owning testing, exception handling, runbooks and deployment documentation.

RPA Developer — Oct 2023 - Apr 2025

- Automated complex visit-confirmation workflows end-to-end, removing approximately 50 hours of manual effort per week through a stable unattended solution.
- Built invoice balance-adjustment logic with matching and recalculation rules, saving approximately 40 hours per week while improving repeatability and control.
- Designed a dispatcher-performer claims workflow that extracts, filters, resubmits and reports rejected claims, reducing processing effort by approximately 10 hours per week.
- Developed reusable Python + UiPath XLSX-generation/upload components and JavaScript-based secure-portal integrations for automated signatures and document retrieval, eliminating recurring manual effort.

PROFESSIONAL EXPERIENCE - CONTINUED

Software Engineer | TotalEnergies E&P Limited (Contract) | Lagos, Nigeria — **Jun 2022 - Oct 2023**

- Designed and maintained software automation and data-processing solutions for subsea operational workflows, integrating inspection data from sensors, maintenance logs and third-party reports.
- Automated retrieval and processing of subsea equipment inspection data, reducing manual data-entry time by 65% and improving data accuracy by 80%.
- Built reusable libraries and standardised workflow components across projects, improving development efficiency by 30% through code reuse and reduced redundancy.

- Collaborated with subsea engineers and data analysts to translate operational requirements into tested technical solutions, with clear specifications, user guides, SDDs and PDDs.

Software Engineering Intern | TotalEnergies E&P Limited | Lagos, Nigeria **Dec 2021 - May 2022**

- Supported subsea engineering by organising inspection and maintenance data, checking reports and preparing small data-processing tools and technical documentation.
- Worked with engineers and analysts on smaller workflow improvements; the hands-on experience led into the Software Engineer role.

SELECTED SOFTWARE ENGINEERING PROJECTS

Full-Stack Educational Coding Platform | FastAPI, SQLite3, HTML/CSS/JavaScript

Designed and prototyped a gamified learning platform with responsive UI architecture, API routes, database schema planning, code-feedback workflows and student-progress tracking.

F1 Intelligence & Telemetry | Node.js, REST APIs, caching

Built backend endpoints combining Jolpica results with OpenF1 timing and telemetry for race, qualifying and driver visualisations.

Large-Scale Web Extraction & Code Parsing | Python, JavaScript, Parsing

Built a workflow to ingest and restructure a 25-page web platform, remove layout-heavy markup and generate clean standalone files for analysis, reuse and downstream processing.

UI Replication & Front-End Systems | HTML5, CSS3, JavaScript

Built responsive Figma-to-code interfaces and interaction systems including navigation, search, modals, mobile menus, translation controls and stateful DOM behaviour.

Automated Electric Groundnut Roaster | C++, Microcontrollers, Sensor/Control Logic

Developed software and control logic for an automated roasting system integrating electrical heating, sensor inputs, thermal behaviour and hardware-to-software operation.

OPEN SOURCE & TECHNICAL PORTFOLIO

Engineering projects: github.com/a-adewale | adewaleadeogun.is-a.dev

EDUCATION & CERTIFICATIONS

B.Sc. Mechanical Engineering | University of Lagos | Lagos, Nigeria **Sep 2018 - Jul 2024**

Second Class Honours (Lower Division) | CWA: 65%

IIT Mechatronics Programme | IIT | Lagos, Nigeria **Dec 2024 - Jun 2025**

4th Overall Best

Certifications & Training: UiPath Automation Developer Professional; UiPath Academy RPA Developer Foundation; Software Engineering, Robotics, RPA & Design (Buildwithvee); Foundations of User Experience Design (Coursera).
